Course Objectives

- To provide practical information and approaches to the diagnosis and management of common problems that impact on the mother and fetus, using a case-based approach
- To evaluate the effects of medical disorders on the course of pregnancy and to examine the impact of pregnancy on the course of medical disorders
- To provide an interactive learning experience whereby health care providers can present and discuss controversial care issues related to medical disorders in pregnancy
- Evaluate the importance of the multidisciplinary patient care conferences in the management of medically complex pregnant patients
