Obstetrics & Gynaecology
UNIVERSITY OF TORONTO

Friday, January 25th, 2019

7:45 A.M. - 8:45 A.M.

**SickKids Peter Gilgan Centre for Research & Learning
686 Bay St., 2nd Floor, Salter Auditorium**

Dr. Hewitt is the Section Chief of Obstetrics and Gynecology at Nationwide Children's Hospital (NCH) in Columbus, Ohio. She is a clinical professor of OB/GYN at the Ohio State University. Dr. Hewitt attended college at the University of Michigan and medical school at Ohio State. Interestingly, those two institutions have the most celebrated rivalry in American college football-- Michigan continues to hold the overall lead in most wins. She did her OB/GYN training at Georgetown University in Washington, DC. After the completion of her training, she returned to the OB/GYN department at OSU where she has remained for her entire career. Dr. Hewitt is a faculty in the Center for Colorectal and Pelvic Reconstruction at NCH--a multidisciplinary team which includes pediatric colo-rectal surgery, gyn, urology, and GI. Recently, OSUMC has partnered with NCH to create the first ever transitional colorectal care program to meet the growing demand for transitional care. Dr. Hewitt is the current chair of the ACOG Adolescent Health Committee and in that role serves as the gynecologic liaison with the AAP Committee on Adolescent Health. She served as the Treasurer for NASPAG for many years, and will follow Dr. Lisa Allen's footsteps in becoming the NASPAG President-elect. Dr. Hewitt as served in national leadership positions in ABOG as well including the qualifying exam committee, MOC committee, PAG committee, and by serving as a board examiner. Dr. Hewitt has written numerous articles and book chapters relating to topics in pediatric and adolescent gynecology.

EDUCATIONAL OBJECTIVES

1. Participants will gain knowledge about various anorectal malformations; how they are evaluated and repaired.
2. Participants will learn about associated abnormalities, including gynecologic conditions.
3. Participants will better appreciate the long term outcomes and reproductive health implications of both the diagnoses and care of this special population to best educate and support them as they transition to adult care.
