Friday, April 20th, 2018

8:30 A.M. - 9:00 A.M.

Dr. Marc Spaanderman, MD PhD, is Chair of the Department of Obstetrics Maastricht University Medical Center MUMC. For over 20 years, his research group focuses on maternal health and the capacity to balance cardiovascular stress before, during and after pregnancy. Care and studies are structured around this topic in order to personalize treatment to prevent future health problems during pregnancy and thereafter. Ways to improve patient empowerment and participation in individuals' care are central themes in the Departments health promoting programs. As initiator and president of the Limburg Obstetric Consortium, an obstetric-midwifery-maternity care and neonatology collaboration, he stands for structured and uniformly supplied transparent care for pregnant women.
