Obstetrics & Gynecology: Core EPA #5

Diagnosing and managing postpartum complications

Key Features:
- This EPA includes recognition, prevention, and management of postpartum complications.

Assessment Plan:

Direct observation or case discussion, with review of clinic notes by OBGYN faculty, subspecialty trainee, TTP trainee, simulation educator, or other specialists

Use Form 1. Form collects information on:
- Patient presentation (select all that apply): delayed postpartum hemorrhage; infection; perineal complications, vaginal hematoma; mastitis; endometritis; venous thromboembolism/pulmonary embolus; septic thrombophlebitis; psychosocial comorbidities; postpartum psychiatric disorders (e.g., psychosis, depression)
- Observation: direct; indirect
- Setting: office setting; postpartum ward; triage/ER; simulation

Collect 5 observations of achievement
- At least 1 wound complication
- At least 1 delayed postpartum hemorrhage
- At least 3 observed by OBGYN faculty
- At least 2 different observers

CanMEDS Milestones:

1 ME 1.4 Apply a broad base and depth of knowledge in clinical and biomedical sciences to manage the breadth of patient presentations in obstetrics and gynecology
2 ME 1.7 Adapt care as the complexity, uncertainty, and ambiguity of the patient’s clinical situation evolves
3 ME 1.5 Perform clinical assessments that address all relevant issues
4 ME 2.4 Develop and implement patient-centred management plans that consider all of the patient’s health problems and context
5 COM 1.5 Recognize when strong emotions (such as anger, fear, anxiety, or sadness) are impacting an interaction and respond appropriately
6 COM 3.1 Convey information about diagnosis and prognosis clearly and compassionately
7 COM 5.1 Document clinical encounters to adequately convey findings, clinical reasoning and the rationale for decisions
8 COL 1.3 Communicate effectively with physicians and other colleagues in the health care professions
