

# Interhospital Rounds 2014-15

presented by

The Association of Academic Professionals in Obstetrics and Gynaecology, the Society of Obstetricians and Gynaecologists of Canada, and the University of Toronto Department of Obstetrics and Gynaecology

## Fetal Experience Programs Life-Long Health

### **Dr. Stephen Matthews**

Director of Research, Fraser Mustard Institute for Human Development & Professor, Physiology, Obstetrics and Gynaecology, and Medicine, Faculty of Medicine, University of Toronto

**Friday, December 5, 2014, 8 – 9 am**

Toronto Marriott, Downtown Eaton Centre  
Salon C & D - 525 Bay Street, Toronto

## **Educational Objectives**

*The presentation will consider how altered fetal environments (including maternal stress and glucocorticoid exposure) can impact development and life-long health.*

*The objectives of the session are:*

- a) To list the long-term health consequences of altered fetal experiences*
- b) To identify the mechanisms that underlie fetal programming*
- c) To describe multigenerational influences of adverse fetal environments*

**With special thanks to our Educational Partners:**

**AbbVie**

**Bayer HealthCare Pharmaceuticals**

**Hologic Canada Ltd.**

**Merck Frosst Canada Ltd.**

**Warner Chilcott Canada Co.**
